Independent Short-Term Rental Yield Analysis

Beato Urban Collection — Lisbon, Portugal

This independent market analysis evaluates the projected short-term rental performance of the Beato Urban Collection apartments in Lisbon, Portugal, based on current Lisbon Airbnb market data, occupancy trends, ADR benchmarks, and operational assumptions applicable to professionally managed hospitality assets. The analysis focuses on apartments acquired at a purchase price of **€280,000** and managed under a professional short-term rental operation structure. Based on current market conditions, the projected **net annual ROI ranges between 8.7% and 12%**, depending on occupancy performance and ADR optimization.

1. Lisbon Short-Term Rental Market Overview

Lisbon remains one of Europe's strongest urban hospitality markets due to year-round tourism demand, digital nomad inflow, increasing international investment, and limited supply of premium branded hospitality apartments. Current independent market sources indicate: • Average Daily Rate (ADR): €120–€150
• Occupancy Rate: 65%–75%
• RevPAR: approximately €90/night
• Premium professionally managed units outperform market averages

2. Beato District Positioning

The Beato district is currently one of Lisbon's strongest regeneration and appreciation zones, benefiting from: • proximity to central Lisbon
• waterfront redevelopment
• growing creative and technology ecosystem
• Hub Criativo do Beato
• strong appreciation potential
• increasing hospitality demand Modern branded apartments in Beato generally outperform older Lisbon inventory due to professional operations, optimized design, higher review scores, and contemporary hospitality standards.

3. Financial Assumptions

Property Purchase Price: €280,000
Management Structure: Professional short-term rental management
Management Fee: 21% of gross rental revenue
Operational Strategy: Dynamic pricing, Airbnb + Booking.com exposure, hospitality-grade guest operations, and occupancy optimization.

4. Financial Performance Scenarios

Scenario	ADR	Occupancy	Gross Revenue	Mgmt Fee (21%)	Net Revenue	Net ROI
Conservative	€125	68%	€31,025	€6,515	€24,510	8.75%
Professional	€140	72%	€36,792	€7,726	€29,066	10.38%
Optimized	€155	75%	€42,431	€8,910	€33,521	11.97%

5. RevPAR Analysis

Revenue Per Available Room (RevPAR) is one of the most important hospitality metrics used globally to evaluate operational performance. Under the professional scenario: **ADR:** €140/night
Occupancy: 72%
Estimated RevPAR: €100.8/night This represents a strong hospitality performance benchmark within Lisbon's short-term rental market.

6. Additional Appreciation Potential

Besides operational rental income, Beato also presents significant long-term appreciation potential due to ongoing urban regeneration, infrastructure investment, increasing international demand, and limited new premium inventory. This creates a dual-return profile for investors: • annual operational cashflow
• long-term capital appreciation

Conclusion

Based on current Lisbon market conditions and existing short-term rental benchmarks, professionally managed apartments in Beato may reasonably target: **Estimated Net Annual ROI Range: 8.7% – 12%** depending on occupancy optimization, ADR performance, operational quality, and market conditions. The Beato Urban Collection should therefore be viewed not merely as a residential apartment acquisition, but as a professionally operated hospitality asset within one of Lisbon's most promising growth districts.
